The image shows a presentation board for a project named 'Carina Sinbandhit'. The board is a white rectangular panel placed on a background of architectural blueprints. To the left of the board, there are several rolls of white paper, some of which are unrolled, showing more of the blueprints. The blueprints themselves contain various architectural drawings, including floor plans with furniture like tables and chairs, and elevation drawings of a building facade with windows and a car parked in front. The text on the board is written in a black, cursive font. The overall scene is a professional architectural workspace.

Q: What does the triangle represent in the diagrams?

A: The idea behind the kitchen work triangle is to clearly mark out distinct spaces (or 'work centres') for each of these fundamental tasks, and to plan an ergonomic work area to reduce the distance and effort required to work effectively in the kitchen.
